2nd Sensitization Programme on “Current annotations on Reporting Adverse Drug Reaction”

Pharmacovigilance Committee, Department of Pharmacology, BMCH organized the 2nd sensitization programme on ““Current annotations on Reporting Adverse Drug Reaction”” on 26th July 2021 for all Doctors, nurses and pharmacists from 1 to 3 PM at BMCH College Lecture Hall 1. Knowledge about Adverse Drug Reaction (ADR) is essential for every health care worker and reporting ADR in hospitals is very mandatory. The training was initiated to educate them with all 13 different types of ADR which could enable all health care workers to recognise and inculcate it in their daily clinical practice and could also aid them in effective monitoring and reporting of ADRs to PvPI. Dr J Mohanasundaram, Chairperson and Vice Principal, BMCH gave a talk on the topic “causality Assessment” by giving with examples of case history. Dr P Elango, Member Secretary & Professor of Pharmacology elaborated on 13 different types of ADRs with various examples. 32 delegates attended the programme. The Certificates of Merit had been issued to all participants. Finally this event was concluded with vote of thanks by Dr Sulthan Al Rashid, Tutor of Pharmacology. All the delegates were given with feedback forms the feedback forms were evaluated All the delegates responded positively. 34.58% delegates strongly agreed and 65.42% agreed the concepts explained in programme.
