VISIT TO : Aavin dairy and dairy products, Ambattur

DATE : 09/06/2022, 16/06/2022, 23/06/2022

STUDENTS : II-MBBS students

ABOUT THE VISIT:

As a part of our curriculum the II-MBBS students were taken to the dairy producing industry 'Aavin' at Ambattur. The students were divided into three groups of 50 each and they were taken on the following dates 9/6/22, 16/6/22, 23/6/22. Once the students reached the venue they were briefed about the general process of the dairy industry, the machines that is used and about the safety measures that are in place for the employees. Then the students were taken in for witnessing the whole process in real and explained about each and every step right from how the milk is collected from the corporate farmers, about storage of raw milk, processing of the collected milk, its packaging process and also about the various quality control tests that is been used. And then the students were taken to the dairy products section where they were introduced to production of ice creams, cookies and sweets. Also the visuals of the Aavin industrial process from the stage of procurement till distribution of the final products was displayed to the students.
